

ANDRES AUGUSTO PROVERO D OLIVEIRA

TECHNICAL OPERATIONS & FIELD SERVICE LEADER | UTILITY-SCALE SOLAR PV & BESS |
COMMISSIONING, O&M & GLOBAL TECHNICAL SUPPORT

+1 346 545 6981 | +52 55 7812 2245 | a.provero@gmail.com | www.linkedin.com/in/aprovero/ | CDMX, Mexico

Work Authorization: Mexican citizen, Italian/EU citizen, and Argentina permanent resident. TN-eligible for qualifying U.S. roles; fully authorized to work in the EU, Mexico, and Argentina.

PROFESSIONAL SUMMARY

Technical Operations and Commissioning leader with 15+ years of experience delivering complex electrical and mission-critical infrastructure across telecommunications, oil & gas, and utility-scale renewable energy. Proven track record building and leading multi-country technical organizations, commissioning more than 800 MW of Solar PV projects, supporting over 2.1 GW of operating assets and 60+ MWh of BESS, and driving technical operations across Latin America.

Established Sungrow's LATAM Center of Expertise and built the North LATAM Field Service organization from the ground up, creating technical governance, certification programs, service partner networks, spare parts logistics, and fleet-wide escalation processes across 10 countries. Recognized for integrating engineering, operations, and business priorities into scalable execution models while aligning field teams, EPCs, OEMs, IPPs, utilities, and executive stakeholders to solve complex technical challenges and deliver reliable execution at scale.

CORE COMPETENCIES

TECHNICAL OPERATIONS • ENGINEERING LEADERSHIP • MULTI-COUNTRY LEADERSHIP • TECHNICAL GOVERNANCE • TECHNICAL OPERATIONS STRATEGY • FIELD SERVICE LEADERSHIP

ENGINEERING & ENERGY SYSTEMS • UTILITY-SCALE SOLAR PV & BESS • GRID CODE COMPLIANCE • SCADA & EMS INTEGRATION • COMMISSIONING & TECHNICAL ACCEPTANCE • EPC & O&M COORDINATION • TECHNICAL ESCALATION MANAGEMENT

PROGRAM & PROJECT DELIVERY • CHANGE & RISK MANAGEMENT • ROOT CAUSE ANALYSIS (RCA) • PROCESS OPTIMIZATION & STANDARDIZATION • CONTINUOUS IMPROVEMENT

STAKEHOLDER MANAGEMENT • CROSS-CULTURAL LEADERSHIP • CUSTOMER & UTILITY ENGAGEMENT • EXECUTIVE ALIGNMENT • R&D—FIELD FEEDBACK LOOP • EXECUTIVE COMMUNICATION

WORK EXPERIENCE

10/2025 – PRESENT • COR SOLUTIONS DBA LATNOVVA, US

PRINCIPAL TECHNICAL CONSULTANT (CONSULTING)

- Provide strategic technical and commercial advisory services for the planning, execution, and operation of complex electrical infrastructure projects across the Americas.
- Support business development by developing technical proposals, solution architectures, customer presentations, and technical due diligence for utility-scale Solar PV and BESS projects.
- Advise EPCs, IPPs, OEMs, and asset owners on commissioning, field service, technical operations, and service delivery strategies.
- Develop digital service platforms, technical tools, and operational processes that improve project execution, customer support, and organizational scalability.
- Support the development of technical service offerings and operational capabilities, helping strengthen customer delivery and long-term organizational growth.

05/2020 – 08/2025 • SUNGROW POWER, MÉXICO

TECHNICAL MANAGER - CENTER OF EXPERTISE (CoE) LATAM

- Established and led Sungrow's LATAM Center of Expertise (CoE), centralizing multi-country commissioning support, technical escalation management, engineering governance, and certification programs across LATAM.
- Directed 80+ L3 escalations, 17 investigations, and 23 rework reviews with HQ R&D and Quality, resolving failures and reducing recurring issues.
- Designed and delivered bilingual certification programs for central and string inverters and BESS, training 35 engineers and technicians with 85–92% pass rates and certifying more than half of LATAM's service organization.
- Launched “Sungrow Sessions” onboarding program for LATAM new hires and partners, standardizing curriculum for 21 participants in 7 countries and reducing reliance on direct L2 support.
- Developed an offline-first Technical Operations platform (PWA) that centralized diagnostics, engineering procedures, troubleshooting tools, and standardized documentation, improving field consistency and accelerating issue resolution across LATAM.

REGIONAL FIELD SERVICE MANAGER PV/BESS – NORTH LATAM (MX/CO/CAM/CAR)

- Led multi-country Field Service and commissioning operations supporting more than 2.1 GW of Solar PV and approximately 60 MWh of BESS across 10 countries, including flagship projects such as Puerto Peñasco (Mexico), Guayepo (Colombia), and Cumayasa (Dominican Republic).
- Built the regional Field Service Engineering organization from the ground up, growing the team from one to nine engineers while defining regional coverage strategies, certification pathways, and operational readiness across Mexico, Colombia, Central America, and the Caribbean.
- Established service-partner and spare parts logistics networks with SLA frameworks, reducing mean time to repair (MTTR), improving first-time fix rates, and lowering logistics costs and standby time.
- Established root cause analysis and technical escalation processes with HQ R&D and Quality, eliminating recurring issues and deploying fleet-wide firmware and hardware improvements.
- Strengthened safety and QA programs (NFPA 70E, LOTO, audits), achieving zero recordable incidents, reducing non-conformities, and ensuring compliance with grid-code and utility acceptance requirements.
- Designed and delivered bilingual technical training programs for employees, partners, and customers across LATAM before formal certification programs were established. The resulting materials became the foundation of the Center of Expertise certification framework.

FIELD SERVICE ENGINEER

- Led commissioning activities for more than 800 MW of utility-scale Solar PV and 24 MWh of BESS across flagship projects including La Pimienta (358 MW PV), Los Cuervos (234 MW PV), Tastiota (120 MW PV), and Moon Palace (12.5 MW / 24 MWh BESS).
- Led commissioning, site acceptance testing (SAT), troubleshooting, and O&M support alongside EPCs, owners, utilities, and SCADA integrators from energization through commercial operation.
- Provided on-site support to the U.S. Service team during critical commissioning windows, restoring generation during downtime events.
- Developed bilingual field procedures and standardized commissioning documentation that improved troubleshooting consistency and reduced downtime across regional projects.
- Executed parameterization and protection settings for grid-code and utility acceptance, validating PR, efficiency, and uptime of units.
- Delivered operator and partner training on safe operation and preventive maintenance, enabling on-site teams to perform Level 1 troubleshooting and reduce dependence on OEM support.

06/2019 – 05/2020 • VECTOR RENEWABLES, MÉXICO

TECHNICAL ASSET MANAGER

- Managed a 400+ MW utility-scale Solar PV portfolio, monitoring SCADA performance and operational KPIs while driving corrective actions with EPC and O&M contractors.
- Led predictive maintenance initiatives, contractor performance, CMMS work orders, warranty claims, and spare parts logistics to reduce outages and shorten time to repair.

- Ensured grid-code compliance, supported technical audits, and closed non-conformities through structured corrective action plans.
- Led the HSE program for corporate and field operations, implementing training, audits, risk assessments, LOTO, electrical safety, and emergency response programs to strengthen compliance and safety culture.

07/2018 – 05/2019 • AMÉRICA MÓVIL, MÉXICO

PROJECT MANAGER

- Directed high-priority infrastructure projects across LATAM, coordinating multi-country teams, vendors, stakeholders, RFI/RFP processes, and risk analysis to improve execution speed and on-time delivery.

11/2013 – 06/2017 • YPF S.A., ARGENTINA

WIRELINE SUPPORT ENGINEER & PROJECT MANAGER

- Led wireline operations for exploration, workover, and completion projects, managing contractors, service quality, and SLA compliance.
- Led incident investigations, contractor performance reviews, and corrective actions, delivering 40+ fishing operations with a 98% success rate while reducing non-productive time.

06/2010 – 10/2011 • SCHLUMBERGER LMTD, VENEZUELA

WIRELINE FIELD ENGINEER

- Planned and executed complex wireline operations for exploration wells, ensuring HSE compliance, operational excellence, and client satisfaction in high-risk field environments.

01/2008 – 12/2009 • CORPODOMOTICA C.A., VENEZUELA

LEAD DESIGN ENGINEER

- Designed and prototyped embedded control systems for elevators and industrial automation, improving reliability and manufacturing efficiency through CAD, testing, and process optimization.

EDUCATION

2018-2019 / EALDE BUSINESS SCHOOL & UNIVERSIDAD REY JUAN CARLOS, SPAIN

MASTER'S IN PROJECT MANAGEMENT (DOUBLE DEGREE)

2004 – 2009 / UNIVERSIDAD NUEVA ESPARTA, VENEZUELA

BACHELOR'S IN ELECTRONICS ENGINEERING

LANGUAGES

- Spanish – Native
- English – Near-Native Professional Proficiency (C2)
- Italian – Intermediate (B1)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

OEM Technical Certifications

Sungrow Certified	2025
• Central Inverters (L1–3)	
• String Inverters (L1–2)	
• BESS (L1–2)	

Safety & Compliance

NFPA 70E	2020
OSHA 30-Hour & OSHA 10-Hour	2020
DC3 Industrial Safety Modules	2019
LOTO • Working at Height • Risk Assessment • Emergency Response	

Professional Development

Creating Loyal Customers – ASLAN	2023
Integrated Project Management – U. Siglo 21	2017
Lean Continuous Improvement – YPF S.A.	2016
